

Safety Culture Survey for Healthcare

Brief, inclusive, and actionable
measurement to drive improvement
of safety culture.

Leapfrog Group Approved for
Measuring and Reporting Safety Culture

Perceptyx takes healthcare solutions seriously, which is why we partnered with customers to develop an innovative survey solution to understand and improve safety culture within healthcare organizations. Our solution provides valid and reliable data, and helps leaders quickly identify the right actions to take, while at the same time helping employees quickly return to their mission-critical work.

Designed for **brevity**, **inclusivity**, and **actionability**, the Perceptyx Safety Culture Survey has everything necessary to achieve Leapfrog accreditation, demonstrating a commitment to patient safety. This solution can be used as a stand-alone survey or in combination with other survey programs to positively impact employee and patient safety through the measurement, insights, and improvement of safety culture.

What's included with the Perceptyx Safety Culture Survey:

Streamlined Survey

Experience, provides a holistic, multi-dimensional measurement of safety culture using **only 14 survey items**

Integrate with Other Listening

Events for an **all-inclusive solution** that measures nursing satisfaction, employee engagement, and more

Comprehensive Safety Culture

Benchmarks from a database of **over 500 healthcare organizations** and **3.5 million employees**

Understand Drivers of Business

Outcomes by **analyzing relationships** between safety culture and **employee turnover, patient experience**, and **quality of care**

Crowdsource and Voting

features give employees an opportunity to **submit open-ended feedback** and **prioritize actions**

Achieve or Maintain

Accreditation with a solution **approved by Leapfrog Group** and **Joint Commission**. AHRQ survey for healthcare also available

Designed to Meet Your Needs

Built specifically with efficiency, inclusivity, and actionability at the core

Designed to be Brief

With **only 14 items** measuring the domains of psychological safety, teamwork, and continuous improvement, this survey quickly assesses safety culture without sacrificing reliability and validity. The content is focused on what matters most so **leaders can move to action faster**, and employees can **spend more time devoted to mission-critical work**.

Designed to be Inclusive

Measure perceptions relevant to both clinical healthcare professionals as well as those who serve in support roles that enable successful patient outcomes. This inclusive measure **ensures all voices are heard** and communicates the importance all employees have in promoting and improving safety culture.

Designed to be Actionable

Use crowdsourcing and voting to **prioritize solutions co-created by team members** to help **quickly identify continuous improvement actions**. Not only does the voting and prioritization process lead to quick identification of where to act, but it also leverages **real-time reporting**, allowing leaders to instantly understand where improvement opportunities exist - **promoting action immediately**.

The Best Strategic Partner for Healthcare Organizations

As the global leader in Employee Experience, Perceptyx provides superior technology, scientific rigor, and unparalleled partnerships with customers

The Employee Experience Experts

Perceptyx is the global leader helping organizations achieve positive people experiences and greater organizational success through an irresistible employee experience

Commitment to Healthcare

Deep, serious, and committed thought leadership, field research, and healthcare industry expertise

Tailored, Research-based Approach

Holistic caregiver and staff listening solutions enabled by world-class partnership model and support

Powerful Integrated Platform

Integrated platform and powerful analytics to deliver insight, drive action, and foster innovation

"We're able to see the results in real-time if we choose to, and there's also a crowdsourcing feature that pairs two different suggestions and allows caregivers across our organization to do pairwise voting and quickly prioritize the most popular responses. So now, instead of a one-time survey, we have a cultural practice of listening to our team members. It moves us from compliance for managers to a true culture of listening and acting, and transparency around those actions"

Brooke Eggleston, Director of Organizational Development and Culture

 BJC HealthCare

The power of your people, *activated*.
